

PIGMENTS FOREVER DYES NEVER

Compared to dye particles, which are much smaller and dissolve, pigment particles are much larger (think a pinhead vs a football) & will stick to your mixture (rather than dissolve) to create stronger & brighter colours.

- ✓ Fade resistant
- ✓ Streak free
- ✓ Vibrant colour
- ✓ Long lasting

Oil Blend vs. Aqua Blend

Our Oil Blend pigments love bakes packed full of butters & fats such as buttercream, chocolate & cake batter! Whereas, Aqua Blend is water based & specifically designed for bakes that are best enjoyed dry, such as royal icing, fondant, macarons & meringues.
